

# Hindered Amine Light Stabilizers (HALS)

*Distona offers a broad portfolio of Hindered Amine Light Stabilizers (HALS) for use in plastics, adhesives, paints and coatings. HALS are among the secondary antioxidants reducing hydroperoxides to alcohols and ketones. The degenerative radical oxidation is thus prevented.*

The regenerative mechanism of HALS

Our portfolio includes the following REACH registered products:

Description	CAS	Applications	Description	CAS	Applications
<b>LS-123</b>	129757-67-1 12258-52-1	Acrylics, PU, Sealants, Adhesives, Rubbers, Coating	<b>LS-770</b>	52829-07-9	PP, HDPE, PU, PS, ABS, EPDM
<b>LS-119</b>	106990-43-6	PP, PE, PVC, PU, PA, PET, PBT, PMMA, POM, LDPE, HDPE	<b>LS-944</b>	70624-18-9	PP, PE, HDPE, LDPE, EVA, POM, PA
<b>LS-292</b>	41556-26-7 82919-37-7	MMA, PU, Paints, Ink, Coating			
<b>LS-622</b>	65447-77-0	PP, PE, PS, ABS, PU, POM, TPE, Fiber, Film
